SUMMARY

I am a Software Engineering student with practical industry experience gained through an internship in the technology sector. I am skilled in developing web and mobile applications using modern frameworks and maintain a portfolio of personal projects accessible on GitHub. I am highly motivated to learn, disciplined, and ready to contribute to a software development team.

WORK EXPERIENCE

Software Engineering Intern, PT Thunderlab Indonesia **April 2026 - October 2026**

- Completed hands-on training within a professional technology industry environment during the internship period
- Applied Software Engineering knowledge learned in school to real tasks and projects at the company
- Collaborated with a development team to complete assigned tasks and projects
- Involved in the application development process, from planning through implementation
- Learned professional workflows within a software development team, including the use of version control (Git/GitHub)
- Strengthened communication and teamwork skills while completing tasks within set timelines

EDUCATION

Software Engineering (Vocational) — SMKN 1 Pasuruan **July 2024 - Present**

- Currently pursuing vocational education focused on software development
- Coursework includes web and mobile application development, database management, and version control
- Completed an industry internship (PKL) as part of the vocational program's applied learning requirement

PROJECTS

1. Merchant App UI/UX Redesign

- Redesigned the user interface of a merchant application, focusing on usability and improved user experience. (Figma)

2. Neo-Brutalist POS (Cashier) Website

- Built a point-of-sale website with a bold neo-brutalist visual style. (Next.js)

3. Outdoor Equipment Rental Website

- Designed a website platform for booking and renting outdoor and camping equipment.

4. Ibadah To-Do List App UI/UX

- Designed the UI for a mobile app that helps users track and remind daily worship activities. (Figma)
